Tagalog Fluent

👤 Profile

Full-Stack Developer with a front-end design focus and a background in design, customer experience, and teaching. I build responsive, accessible UI with React, TypeScript, and JavaScript, and can work across the stack when needed.
I recently interned at a sustainability startup, and am now doing an internship at Brown Juice Co as a front-end developer. I'm also a Le Wagon Tokyo graduate and the founder of TokyoScene, a live music app built with Ruby on Rails. I enjoy creating intuitive, user-centred products and am eager to contribute my skills in a collaborative, creative team environment.

</> Web Development Projects

The Design Externship
🔗 brownjuice.co/study
Front-End Developer (Internship)
Built OpenAI-powered features, including an article summarisation tool, to improve content accessibility and user experience on a design education platform.

TokyoScene
🔗 tokyoscene.me
Lead Front-End Designer/Developer
A web-based event aggregator using Ruby on Rails, that utilises Spotify data to recommend live music events in Tokyo based on the user's favourite artists and genres.

💼 Work Experience

May 2025 - Present

Brown Juice Co   📍 *Tokyo, Japan*
Front-End Web Developer (Intern)
Contributing to front-end development using JavaScript, Vue and OpenAI at a creative tech company specialising in web applications and design systems.
- **API Integration:** Designed and implemented an AI-powered summarisation feature using OpenAI's GPT API to generate concise summaries from curated article content, enhancing user engagement and content accessibility.

Nov 2024 - Jun 2025

Sustainability Page   📍 *Tokyo, Japan*
Front-End Web Developer (Intern)
Developing and maintaining Sustainability Page's website using React and TypeScript, improving UI and accessibility across key user flows.
- **Problem-solving:** Identified and fixed front-end issues using React and TypeScript, improving site usability and consistency across components.
- **Collaboration:** As a member of the development team, implemented accessible, responsive UI updates in a fast-paced startup, aligning code with design specs and product priorities.

Dec 2020 – Present

Eimeikan Junior-Senior High School   📍 *Tokyo, Japan*
Assistant Language Teacher - JET Programme
Designed conversation lessons and ran extracurricular activities to enhance students' English language skills and cultural understanding.
- **Presentation Skills:** Delivered engaging lessons and facilitated interactive presentations, effectively conveying complex information to diverse student groups and enhancing overall comprehension.
- **Project management:** Successfully organised and led extracurricular activities, coordinating resources and schedules to ensure smooth execution.
